

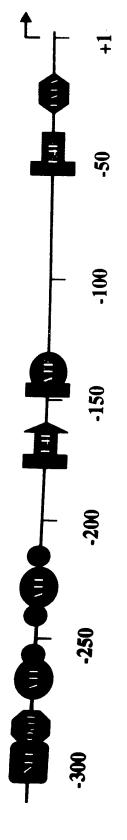

FIGURE 1

Symbol Legend:

NF-I binding site centered around -300

Oct1 binding site positioned near -285

E4TF1 binding site positioned around -140

TATA box positioned near -30

EivF binding sites near -165 and -50

ATF binding sites near -260, -230, and -140

Sp1 binding sites near -255, -240, and -220

transcriptional start site denoted as +1 EAF inverted repeat binding sites near . 165 and . 50
